

# What is Location Network Media? ... enhancing Regional Location Agencies ...

Location Network Media is a web-based media management application designed specifically for locations. Through syndication (go to "Syndication" for more information) of the industry's premiere location scouting tool, we make it easy for you to centralize, manage, distribute and store locations.

If you are in the business of film locations and imagery, whether nationally or internationally, it all translates into this --- Location Network Media is essential to attract potential filmmakers and clients. If you are interested in launching a regional location mecca, i.e. *Location Network - London*, we are ready to put you on the map, give you a Hollywood connection and include you in "The Network."

The requirements are minimal. No specialized technical expertise is needed, there is no software to install, no hardware to buy nor is there need for IT support and maintenance. If you have a computer, browser and internet connection, you are an eligible candidate for this powerful yet intuitive application.

- **FIND IT** Uploading has never been faster or easier. Whether scouting generically, for an upcoming shoot or to entice filmmaking, you and your scouts will be able to quickly upload your images directly into a Lightbox. (Java script is required)
- **SHOW IT** Location Network Media's Light Box provides you with a powerful yet simple platform for displaying your locations. Uploaded images are available for viewing and printing from the Light Box. Maps to locations are accessed by including contact information. Screening Rooms can be accessed or emailed to any one of your choosing. And because it's a web application, it can also be accessed from any computer across the globe. Clients and potential clients can immediately view your locations. No overnight expressing. Your clients can print what they like and even download images onto their desktops.
- **KEEP IT** Once a Lightbox has been viewed, all of the locations are secured neatly in their folders and are automatically transferred to your database. No scattered CD's or dog-eared folders to deal with. We keep you neat, tidy and organized. You build your own location library keeping all locations for future jobs, bids and reference.

Empower your Company with Location Network Media's management system built specifically for the uploading, presenting, and storing of location images. Finally, an investment that rocks!
