

What is Location Network Media?

. . . streamlining Television Series . . .

Location Network Media is a web-based media management application designed specifically for locations and location scouts. Through syndication (go to "Syndication" for more information) of the industry's premiere location scouting tool, we make it easy for television series to centralize, manage, distribute and store locations and information.

Location Network Media was designed for diversity and volume. Its application can be tailored for short term, long term or intermittent usage.

The requirements are minimal. No specialized technical expertise is needed making its application perfect for production. There is no software to install, no hardware to buy nor is there need for IT support and maintenance. If you have a computer, browser and internet connection, you are an eligible candidate for this powerful yet intuitive application.

- **FIND IT** Uploading has never been faster or easier. With one of the fastest upload tools, the Location Department will be able to upload their images directly into a Light Box. (Java script is required.) Since the application provides diversity and intelligence, multiple scouts and fast-paced production are welcomed.
- **SHOW IT** Location Network Media's Light Box provides you with a powerful yet simple platform for displaying your locations. Uploaded images are available for viewing and printing from the Light Box or your custom Screening Room. Maps and satellites of locations are accessed by including contact information.

Screening Rooms can be accessed or emailed to any one of your choosing. And because it's a web application, it can be accessed from any computer across the globe. Additionally, Light Boxes can be created to represent individual episodes keeping the Location Department impeccably organized.

- **KEEP IT** At the completion of the job all of the locations are secured neatly in their folders and are automatically transferred into the database. No scattered CD's or multiple platforms to view locations from. At the conclusion of the series, all locations and information can be placed and given to production on back-up CD's.

Empower your next television series with Location Network Media's management system built specifically for the uploading, presenting, and storing of location images. Finally, an investment that rocks!
